

In Context
By Lean Kruschev

I. Production Process

With Marx we commence from production process – in this sense we are in context – if we develop power of Communist type, we commence from bureaucracy, and then if we add to it civil society, we develop newspapers.

II. Financial Cycles why Surplus-Value is developing around Production Process

As factories develop, and industrial belts form out of thin air, called the nature of combination, combinations develop and so does monopoly capitalism, which then develops and debates – surface of society, commodities.

III. Unleashing the Communist Version – Absolute

I want to run a factory, run agriculture, run everything everyday.

IV. Sirohi – the Prophet

He is told to run everything alone, a man, Heidegger – he gives up on working and drinks.
